WING LUKE MUSEUM

The Coronavirus has created a serious public health crisis that has health experts releasing rapidly changing recommendations. We continue to monitor these news reports and recommendations from key public health organizations and experts so that we can provide the safest environment for our employees and our customers.

The Wing Luke Museum, as always, is committed to protecting the health, welfare and safety of all of our employees, members, donors, and visitors of our museum. We continually seek and strive to provide a safe, clean and enjoyable environment so that all of our visitors can relax and immerse themselves in our diverse exhibits, programs and events.

To help minimize any potential fears that people might have about the Coronavirus, the museum has added several additional precautionary measures to help alleviate those fears and to provide an even safer environment in which to peruse our museum. We hope that by increasing our cleaning and hygiene efforts and providing additional hygiene options, you will feel the museum is a safe place to visit and will continue to come down to the museum and experience what we have to offer you.

The museum will continue to be open and operate under our normal operating hours – Tuesday through Sunday 10am – 5pm and First Thursday from 10am – 8pm. We look forward to seeing you!

Here are the additional operational measures implemented by the museum:

• Facilities staff will wipe down all railings and door handles located in the museum, a minimum of 3x during each day.
• Staff will perform additional wipe downs as they complete regular museum sweeps.
• We will be installing new “Anti-bacterial” soap dispensers in every bathroom in the museum.
• We have temporarily shut down some of the interactive components of our exhibits to minimize the spread of any disease.
• Disposable gloves and disinfecting wipes are available at the front desk to any employee or visitor who would like to use them while visiting the museum. Masks and hand sanitizers will also be provided when supplies become available.
• Alcohol swabs are available at the front desk for anyone who wishes to wipe down headsets.
• We have adjusted our HVAC system to maximize fresh air intake and minimize recycling air.

Thank you,

Gary Yamamoto
Chief Operating Officer
